

I fully support XM Radio and want them to continue to offer as many listening options as possible. I commute 35 miles each way to work and XM helps make my commute bearable. I pay for this service and do not expect the National Association of Broadcasters to dictate what I am permitted to hear. XM provides the kind of programming I demand and deserve.

I respectfully urge the FCC to reject NAB's petition 04-160

Yours truly,

Peter G. Bregman
